

Sustainable (Green) Procurement Policy

At SAVITA, we believe in '**Bonds Build Businesses**' and are committed to leveraging innovation, maintaining our steadfast focus on sustainability, and delivering superior and environmentally friendly products to our customers, resulting in exceptional performance. We focus on ensuring sustainable business operations to minimize our environmental and social impact. A long-term sustainable development of our suppliers is critical to our joint success and we value our relationship with suppliers who share the same approach and vision towards doing business and to fulfil this.

Objective:

Adopt a holistic approach of integrating good Environmental, Social and Governance practices in our value chain to enhance sustainability performance

Policy :

- Spread awareness about good Environmental, Social, and Governance practices through a comprehensive Supplier Code of Conduct
 - Maintain the highest level of ethical standards and transparency in dealings with all the suppliers
 - Comply with all relevant statutory provisions pertaining to procurement
 - Continuously strive to explore alternative raw materials
 - Give health and safety a priority
 - While evaluating, give priority to energy-efficient and greener products and services
 - Work jointly with suppliers to improve their environmental performance
 - Educate suppliers to improve their manufacturing processes to reduce greenhouse gas emissions and reduce carbon footprints
 - Strive to map the supply chain to identify the Chain of Custody for critical materials
-
- Develop a systemic plan for engaging with suppliers on ESG aspects
 - Maximize usage of recycled packaging materials
 - Encourage innovations of greener products and services
